Hansgrohe – a brand and a promise.

There's now a little button in the bathroom and kitchen that provides a tremendous amount of pleasure.

For over a hundred years, we at Hansgrohe have been inventing new ways to use water, and we are proud to play a part in the evolution and development of the bathroom as a living space. What was once a functional room has now become a place of stylish living and well-being. This is not only true of the bathroom, but of the kitchen too as the cult of cuisine is ever growing.
As a consequence, the demands made on design and function have also changed radically. As one of the leading innovators in the sanitaryware sector, we are proud of our active involvement in this trend. The bathroom and kitchen are being revolutionised by the smart operating technology behind the Select button. And thanks to our award winning Rainmaker Select, we have again set new aesthetic and quality standards for the shower.
Discover on the following pages how outstanding design together with innovative technology and quality can convert water into an exceptional experience in your own home.

Happy reading!

Yours,
Richard Grohe

Enjoy the interactive experience of the Hansgrohe products in your home or on your iPad – with the Hansgrohe Showroom app.
www.hansgrohe.co.uk/showroom-app

We work hard to exceed your expectations in everything we do.

Quality – made by Hansgrohe.

QUALITY
Made by Hansgrohe
DESIGNED FOR LIFE

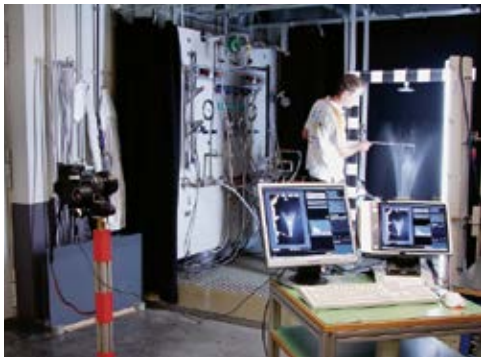
We are dedicated to developing products that exceed your expectations, continually innovating to enhance your water experience. Reliable products that will last for a long time, with excellent design and exceptional user comfort. To that end, we are devoted to tinkering, testing and manufacturing to the highest standards, here at our head office in Germany's Black Forest and also at our other sites all over the world.

TRADITION.

Hansgrohe fascinates people all over the world. Timelss design for long-lasting reliability and sustainability, our products bear testimony to over a hundred years of experience. This creates trust and gives you day after day the confidence that you have made the right choice.

DEVELOPMENT.

Our engineers devote all their energies to transforming a normal shower into a showering experience. As a result, we are constantly developing new spray types and handling methods that make your daily routine with water as individual and convenient as possible.



TEST CENTER.

Your satisfaction is our highest priority. Products that function perfectly are essential. In countless series of tests, we ensure that our mixers and showers are absolutely suitable for everyday use. If you wish, you could also help us and become a passionate product tester.

PRODUCTION.

The Hansgrohe name testifies to Hansgrohe quality. So you can be sure of this, all our locations all over the world work to Hansgrohe's exceptional quality standards.

PRODUCT CLASSIC.

Thanks to outstanding design, a high level of functionality, and meticulous production, you can enjoy years of water experience with our products.

DESIGN.

So that you can take pleasure in the form and function of our products every day, we have been working with world renowned designers for many years. We are delighted that our aesthetic ambitions are not only appreciated by our customers, but are also winning awards from international design juries. Most recently the 2015 iF Gold Award for the Rainmaker Select 460 3jet Showerpipe.

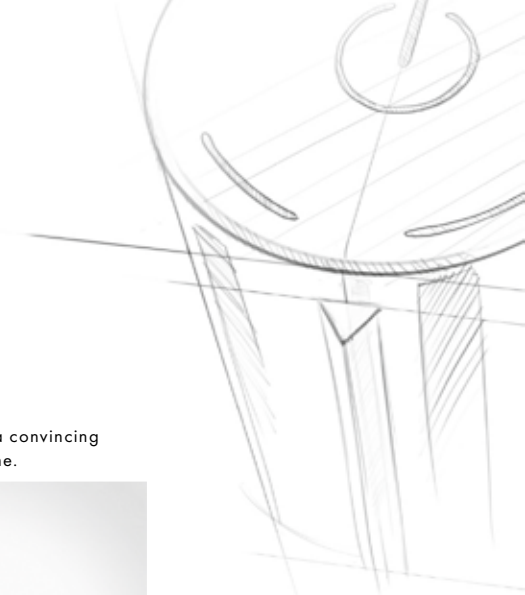
The most beautiful way to organise your daily routine.

Design – made by Hansgrohe.

COMPANY RANKING 2015 POS 11

To us, design is not a matter of taste, but an attitude. In cooperation with the multiple award winning team from Phoenix Design, we are constantly working on outstanding creations. In doing so, we give top priority to finding the most intelligent solution. After all, design and function must go hand in hand if we are to create products that fascinate with extraordinary quality and at the same time redefine aesthetic standards. The 2015 iF company rankings even list Hansgrohe as the best manufacturer in the sanityware industry, at eleventh place among all manufacturers and sectors.

The cooperation with Phoenix Design gives rise to products that are setting new standards in both visual appeal and functionality. From the initial sketches to the finished product, our love for detail plays a crucial role.



From 2009 to 2011, the PuraVida mixer never failed to impress the discerning jury.

The Talis Select S 100 is a convincing product over the whole line.

Awards rained on the Raindance Rainfall 240 Air 3jet between 2007 and 2009.

The Raindance Select E 120 hand shower delighted at the touch of a button in 2013.

At the 2014 Focus Open, the Metris Select 320 kitchen mixer was the first to win a Silver Medal for the kitchen.

The glossy chrome Rainmaker Select 460 3jet Showerpipe even won the Gold iF Award in 2015.

A button that makes your life easier.

Select technology – invented by Hansgrohe.

In our search for innovative solutions, there is one question we keep asking ourselves: How can we make everyday life more comfortable for you? In the bathroom and in the kitchen, the key is ease of use. Inspired by buttons that made the world easier with a simple click, we developed a button that was as simple as it was ingenious. In 2009, we launched the first hand shower with a purely mechanical selector button. Since then, the Select button has been promoting intuitive use in the bathroom and kitchen. In the shower, spray types and shower heads can be changed at the push of a button, while the flow of water can be switched on and off at bathroom and kitchen mixers effortlessly.

The Select button enhances comfort and ease of use for daily routines in the bathroom and kitchen.

2011

Raindance Select hand and overhead showers were the first Hansgrohe products with Select technology.

2012

2013

2013

2014

In the kitchen, the Select button keeps the work flow moving.

2015

Our Select mixers and showers are prime examples of how products can make life easier with practical and lasting effects and become firmly anchored in everyday culture.

Experience the world of comfort.

References – examples of Hansgrohe's excellence.

All over the world, developers and investors work hand in hand with architects and planners on sophisticated projects. They are constantly in need of intelligent and aesthetically appealing solutions for handling the essential element water. The mixers and showers from the Black Forest lend top addresses that define design and comfort: in impressive hotels and public buildings, in private residences and royal palaces, in exclusive sports clubs, and in cruise ships and luxury yachts. You will find lots of other references on our website. **www.hansgrohe.co.uk/references**

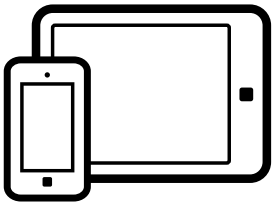
Experience our products easily online.

Hansgrohe mobile – the interactive Hansgrohe pages.



With such a wide range of Hansgrohe products, you will be able to experience water just as you wish to. There are lots of online applications that you can use to obtain as much information as you need. Bringing the Hansgrohe innovations to you wherever you are.

You can experience interactively and learn more details about many Hansgrohe products on your iPad or smartphone.

Hansgrohe Showroom App.

The Hansgrohe Showroom app lets you experience our showers, mixers, etc., interactively. For instance, with the spectacular photo function. With just a touch, you can bring any product you wish directly into your own home. The selected product is then centred in the actual camera image. Now shoot a picture from the right perspective – and your dream product has become a virtual installation in your home. Then, if you like what you see, you can then use the integrated search to find your nearest retailer.

Interactive features:
- **Photo function to visualise what the product will look like when it is in your bathroom**
- **Videos on technologies and spray types**
- **List of your favourite Hansgrohe products**
- **Find your nearest showroom**

Hansgrohe@home App.

As your bathroom can't come to Hansgrohe, Hansgrohe can simply come to you: the Hansgrohe@home app is the easiest way for anyone who would like to see what their chosen mixer or shower solution would look like in their own home. Just take a photo of your current bathroom situation, use your finger to highlight the existing mixer or shower and replace it with your favourite Hansgrohe product. You will see the results on-screen. The integrated retailer search will instantly show you where your nearest showroom is. The app for iPhone, iPad and android smartphones is available on the Hansgrohe website or directly from iTunes or Google Play.

Showering in a new dimension.

Rainmaker® Select™.

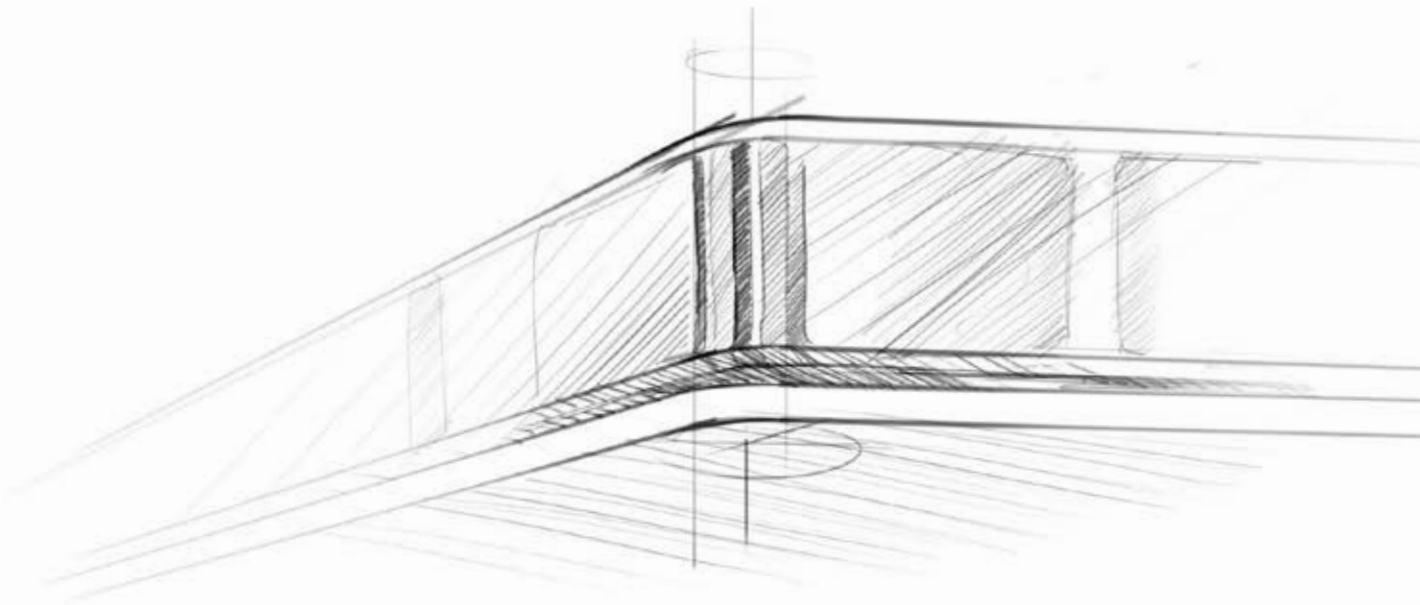
A real masterstroke, from design to material.

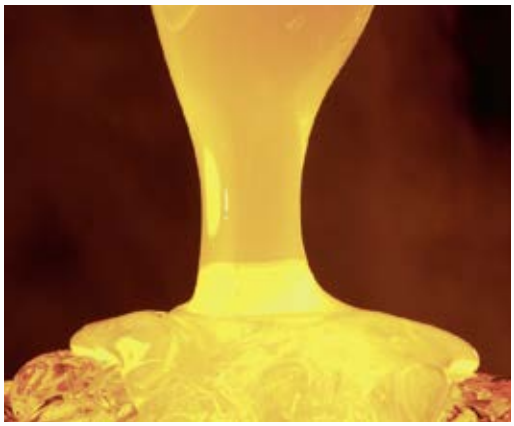
Rainmaker® Select owes its appeal primarily to its breath-taking design and the materials it uses.

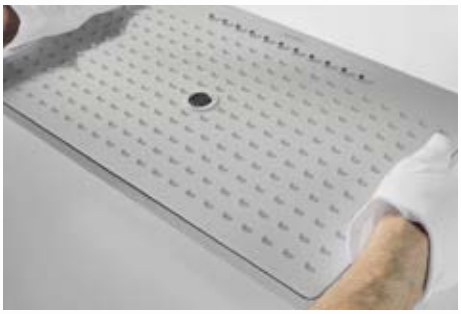
In recent years, the trend for lifestyle bathrooms has become more prevalent. As a result, the demands made on this room have changed accordingly. From a functional wet room to a place of aesthetic appeal, relaxation and well-being. Inspired by this realisation, we got together with Phoenix Design to develop a totally new water experience of the highest quality – Rainmaker Select. The reduced and linear design of Rainmaker Select is instantly appealing. This clear-cut design language is also reflected in the choice of materials. The generous glass spray face and its slender chrome frame give Rainmaker Select a gleaming and exclusive aesthetic appeal. On the one hand, its white-backed glass and polished metal surfaces emphasise the naturalness of the bathroom, but at the same time, they make a visual reference to the surrounding elements, such as ceramics, tiles or mirrors. It is the exceptional workmanship, not just the overall impression, that makes Rainmaker Select so appealing. For example, each of the more than 200 holes in the glass plate of the overhead shower is cut with a precision laser – a highly complex manufacturing process. But true greatness can only ever be achieved through a passion for detail.

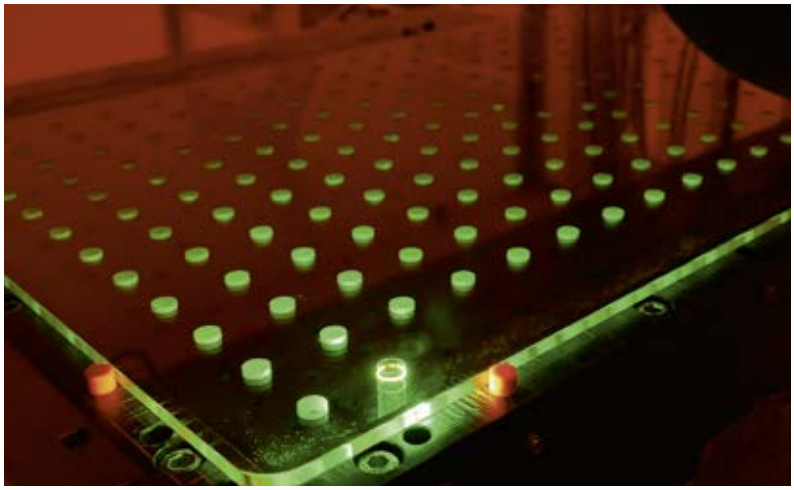
GOLD AWARD 2015

The Design.
The innovative room and product concept was created in collaboration with Phoenix Design.









The product.
Carefully tested and assembled by hand, Rainmaker Select complies with the highest quality standards.

The material.
The manufacturing process of the glass spray face combines original material with the latest laser technology.

2 m
Shower area

Ambience 1: The shower is the focus.

Rainmaker® Select Showerpipe – the ideal surface-mounted solution.

No other room in the house has changed as much in recent years as the bathroom – what was once a functional wet room has now become a place of aesthetic appeal, relaxation and well-being. The bathroom has not necessarily got bigger, but there is an increased demand for extraordinary design – both architecturally and in terms of products. The shower area is taking up more and more space, and developing into the focal point of the bathroom. The size of the Rainmaker Select Showerpipe alone means it can more than fulfil its role. On the one hand, its gleaming glass and chrome surfaces make it a commanding element of the room and on the other, ensure that the shower fits harmoniously into the overall look of glass walls, mirrors and ceramics.

Ambience 2: The innovative solution for the shower.

Rainmaker® Select surface-concealed installation.

Today the bathroom is no longer just a place for personal hygiene; it has become a room for living and a space for new ideas. Materials such as wood and fabric now radiate warmth and ambience here, seating areas invite you to relax and recharge your batteries. So why not also take a different approach to designing the shower? Here, the ShowerTablet Select 700, with its generous storage shelf, is fitted directly to the water connections coming from the wall, whereas the connection to the single-spray overhead shower is hidden behind the wall. The perfect combination of exposed and concealed installation (ConEx). A shower that is not only functional, but an exceptionally elegant focal point in the bathroom.

Ambience 3: Perfectly integrated design and technology.

Rainmaker® Select concealed solution.

The fusion of shower and interior space plays a crucial role in modern bathroom design. Whether through the flawless transition from dry zone to wet zone provided by a floor-level shower, the removal of the disruptive boundaries caused by glass partitions, or even the seamless integration of the shower mixer itself. The Rainmaker Select concealed installation shows that even a large shower can fit into any bathroom in a way that is elegantly understated, yet at the same time luxurious. The modern technology disappears inside the wall, while the white-backed glass surfaces on the overhead shower and thermostat harmonise easily and elegantly into wall and ceiling. Creating maximum showering pleasure in any bathroom. The shower becomes the focal point of the bathroom. Regardless of the actual size of the room.

Set to nothing but pleasure:

The whole Hangrohe showering pleasure.

As individual as you are: Our range of showers and sprays.

Choose your perfect shower configuration and the matching control from our variety of options.

Soft summer rain, a powerful waterfall or a revitalising shower spray? Whatever your idea of the perfect shower is, through our showering options you will be able to turn your dream into genuine shower pleasure. Design your individual shower – with the shower configuration that suits you.

Hand showers and shower sets.

The basic solution: Hand showers can be used in a great many ways, on their own or in combination with a shower set – the matching complement to mixers and thermostats.

Overhead shower.

For relaxing or rejuvinating – because every day deserves a different shower. Concealed installation, integrated into the wall.

Showerpipe and Showerpanel®.

Shower pleasure in perfection – including quick, easy installation on existing water connections. Perfect for renovations.

Surface-mounted shower control.

Fits best on existing connections. The easiest way to a new shower experience. Also ideal for renovations.

Shower control concealed.

The mixer body disappears inside the wall – for complete freedom of movement under the shower.

Shower control ConEx (the perfect mix of concealed and exposed installations).

For this installation type, the ShowerTablet is the first that can be freely combined with a single-spray overhead shower. At the same time, the connection runs invisibly inside the wall.

Our spray types.

Greater enjoyment with the many spray types for hand and overhead showers.

Simply scan the code and experience the spray types in the video.

Rain and Rain XL
The openings on the hand or overhead shower may be small, but their effect is all the greater: The Rain spray revitalises and refreshes with its pleasant power enveloping the body. It is therefore ideal, for example, for rinsing out shampoo quickly and thoroughly.

RainAir and RainAir XL
If you are looking for relaxation and you want your soul to be pampered by the water. The hand or overhead shower with the luxurious RainAir spray would be perfect for you. This spray provides air-enriched drops from a large, wide jet, to wash your cares away.

SoftRain
The gentle SoftRain water spray gently wraps itself around the body. A treat for the skin – and for the soul, of course. Whether a daily shower or for relaxation, the SoftRain spray is always the right choice. Its strengths come into their own in a quick shower in the morning and in a long soak in the bath after a hard day.

IntenseRain
Rinsing out shampoo is easy with the strong IntenseRain water spray. Perfect for setting yourself up for the day. The IntenseRain spray not only rinses out shampoo, but it also washes morning tiredness down the drain – for a refreshing start to the day.

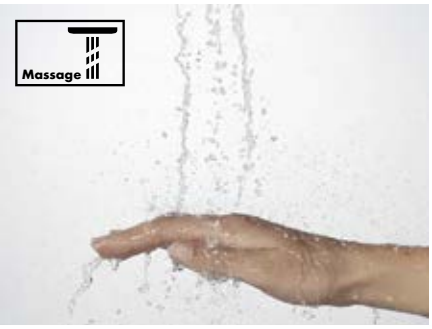
TurboRain
The all-purpose tool for quick results: The revitalising TurboRain spray lives up to its name. The pure power of the most powerful of all Rain sprays provides a refreshing shower experience. For those who like things to be quick and straightforward.

Mix
Gentle and dynamic at the same time. The mix spray combines the rich, soft RainAir spray with the strong, revitalising CaresseAir spray. Soft drops wrap themselves around the body, while a warm targeted water flow in the middle massages the skin. The perfect combination for daily showering pleasure.

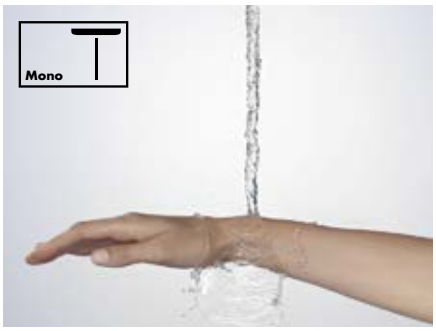
The spray type may vary with the product type.

Whirl
The concentrated Whirl spray simply washes away the exertions of the day. Whether hand or overhead shower: Three single sprays revolve around each other for an intense massage effect that dissolves tension.

CaresseAir
Five strong single sprays combine in a revitalising, strong massage spray for pleasant relaxation. Just the thing after exercise or a hard day at work – good as new in minutes.



Massage
A concentrated spray that simply washes the day's stress away. The targeted spray easily relaxes tense areas. The innovative circular arrangement of the sprays turns the shower into a mobile wellness treatment for the home bathroom.



Mono
A targeted, soothing relaxation spray from the centre of the shower. The lightness of the Mono spray helps you to unwind, making it the perfect spray for relaxing.

RainFlow
An overhead shower with the clear, beautifully shaped RainFlow cascading spray brings the waterfall experience to the bathroom. This lets you enjoy water in its natural form, as a cascade from above on the neck and shoulders. This can be directed specifically to these parts of the body and tension quickly disappears. This is a trend especially in the wellness bathroom.

RainStream
The new RainStream of single sparkling jets is a crowning achievement of the Hansgrohe spray developers. These special overhead shower sprays do not constrict, but remain unvaryingly revitalising and intense right down to the floor. The result: a new, revitalising shower experience, irrespective of the users height.

The spray type may vary with the product type.

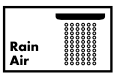
Our hand showers: Innovation at your fingertips.

The little button that provides a tremendous amount of pleasure.

The new Select technology on the hand shower now makes showering even better. Instead of the tedium of twisting and adjusting the spray face, all you have to do to change between the three spray types is touch a button. Our hand showers also look really good. They are available in round or square designs, in pure chrome or chrome with a white spray face – to delight the eye as well as being inviting to the touch. What's more even the environment can be happy: thanks to the intelligent flow limiter, the EcoSmart version reduces water consumption by up to 60%.

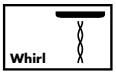
Raindance® Select E 120 3jet Hand shower

Gentle shower rain to enjoy with air-enriched drops from large jets.



Strong shower rain from small jets – perfect for rinsing shampoo out of the hair.

Concentrated massaging spray from rotating jets to relieve tension.



Switches over to a different spray type intuitively and in moments, and provides pleasure at the touch of a button.

Our overhead showers: The loveliest rain in the world.

Experience the ultimate in shower pleasure at the touch of a button.

Now it's also possible to select the spray type on the Hansgrohe overhead showers at the touch of a button. Rain and RainAir offer relaxation – as full sprays over the entire spray face. The RainStream spray showers with twelve lavish rainsprays, wide and sparkling, to wash your cares away. The appearance of these overhead showers is just as varied as the showering experience. They are available in the classic round shape or as a contemporary rectangular form; in pure chrome or chrome with a white spray face. They have also been given an elegant, subtle chrome edging, a higher, fashionable rim and an attractive wave structure. The spray face is easy to detach for cleaning, which helps extend the lifetime and keeps it looking as good as new.

Our shower control for surface-mounted installation: for pure shower pleasure.

Now even more quintessential thanks to the Select button.

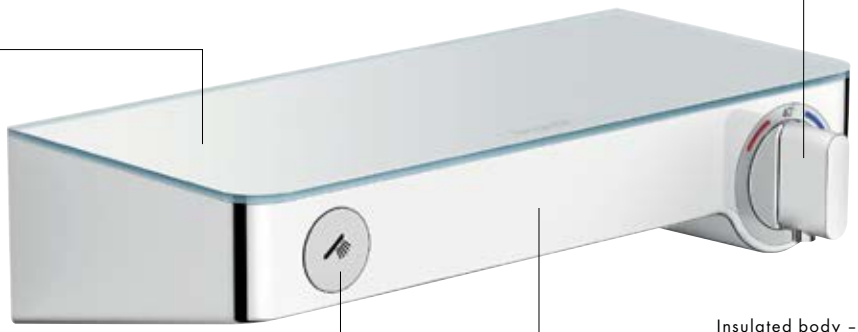
The Select technology now makes it even easier to choose your favourite spray type on the thermostat. The hand shower switches on and off at the touch of a button. Furthermore, the thermostat holds the shower temperature constantly at your chosen setting, preventing unwanted hot or cold surges. The ShowerTablet Select 300 makes everything easy right from the beginning. All working parts are outside the wall and fit directly onto the existing water connections – so it's perfect when renovating.

ShowerTablet® Select 300 Shower thermostat

Focus Open 2013
Silver

Glass storage shelf.

Also available in white-chrome.



Select the desired temperature.

Insulated body – keeps the mixer housing at a pleasant temperature and prevents scalds.

Switch the hand shower on and off.

Intuitive.

The Select button is entirely intuitive and easy to operate from the front. You just switch the water on and off.

Practical.

There is plenty of room on the glass surface for toiletries, which eliminates the need for an additional shower shelf.

Pinpoint precision.

The desired temperature can be set precisely on the large, user-friendly turning control that is located on the front of the thermostat.

Our shower control for concealed installations: the new way to control pleasure.

For a shower experience that gets under your skin.

The ShowerSelect concealed controls completely redefine showering pleasure. The showers are easy to switch on and off using the flush integrated Select buttons. The buttons are easily understandable, and because they are made exclusively from mechanical components, they are also extremely reliable and long-lasting. The technology for our concealed shower controls is in the wall. In the iBox universal, to be precise. Divided into two components, one in front of and one within the wall, they can be installed separately. This gives you more time in the final choice of visible components – and more flexibility, should you ever want to change them. The flat installation provides even more freedom of movement in the shower.

ShowerSelect® with integrated hose connection and hand shower holder

Our shower control options for concealed installation.

The right solution for every application.

Every person has their own expectations where showering experience is concerned. That is why you can choose how many functions your Hansgrohe shower should have. From the single-spray shower to the complete set with several spray types for hand and overhead shower, every application finds a matching option of concealed shower control.

What is a thermostat?
The desired water temperature is preset at a handle and then kept constant by the thermostat valve. Hot or cold shocks resulting from fluctuating water temperatures are a thing of the past.

What is a mixer?
Mixers are especially suitable for pipes with a stable water pressure. Here too, the water temperature remains constant and so offers the maximum showering pleasure.

Shower control for 1 function.

Simplicity at its loveliest: These finish sets let you switch a function on and off, i.e. a hand or overhead shower. On ShowerSelect products this is easy to do at the touch of a button, while on the Ecostat and the single lever mixers this choice is made by turning a handle or lever. You control the water temperature using the large handle.

Shower control for 2 functions.

Twice the pleasure. With these finish sets, you can switch on and off 2 functions at the touch of a button (ShowerSelect), handle (Ecostat) or pull lever (single lever mixer), i.e. one hand and one overhead shower. The water temperature is set using the large handle.

ShowerSelect® glass thermostat solution in white/chrome and black/chrome

ShowerSelect® thermostat solution

iBox® universal

Ecostat® thermostat solution

Metris® mixer solution

One for everything.

With the iBox universal, the mixer technology is concealed in the wall. It looks good, and provides more freedom in the shower and more flexibility. As it is compatible with the majority of Hansgrohe concealed thermostat and mixer solutions, the iBox can be installed before you choose your finish set.

Shower control for 3 functions.

For individual pleasure: ShowerSelect lets you operate no fewer than 3 functions. In other words, you can switch on and off the hand shower at the button or between the two spray types for the overhead shower. On the iControl and all other sets, the choices are made manually using a handle. You use the large handle on the thermostat to precisely control the water temperature.

Shower control for 4 functions.

Unlimited shower pleasure: ShowerSelect lets you operate 4 functions. You can switch on and off the hand shower at the button or between the three spray types for the overhead shower. The sets with iControl and all the other systems are controlled manually using handles. The large handle on the thermostat controls the water temperature.

Water at its most perfect:

Basin mixers.

Our three style worlds.

Turning your dream bathroom into reality.

The bathroom has long since progressed from being a purely functional room into a feel-good area. More and more people are creating multi functional rooms where design and comfort are as important as high-tech functionality. The feel-good culture adds its bit to this trend: the bathroom has also long been about relaxation and withdrawing from the world. A room where you spend time to escape from the stress of daily life. Our mixers reflect this development in the balance between perfect function and beautiful design. To help guide you to find your perfect, individual bathroom, we have created three different style worlds for our products. You will find plenty of ideas for your dream bathroom and personal taste here. Let us inspire you.

Avantgarde.

Give the room a special kind of sensuousness with the playful details of the emotional design language.

Modern.

This style is setting standards in form and function. The result is a calm room that is notable for its clean lines and sensuous shapes.

Classic.

A design language that equates to classic beauty and radiates a warm, harmonious atmosphere.

Avantgarde Style world.

Award-winning design in white and chrome.

The bathroom is not about tomorrow's trends, but about your own trend. So, if you prefer individuality, you will love the mixers from our Avantgarde style world.

www.hansgrohe.co.uk/avantgarde

Avantgarde Style world.

PuraVida®.

The rounded lines and organic forms of the PuraVida mixers radiate a creative self confidence. The white and chrome surfaces blend together seamlessly in the DualFinish process. PuraVida mixers are available in various heights – for the individual space that we call ComfortZone.

PuraVida® 240

PuraVida® 200

PuraVida® 110

PuraVida® 100

Modern Style world.

Contemporary. Harmonious. Functional.

Modern bathrooms need modern solutions. Here, an excellent, contemporary design language plays an essential role. Equally essential is a functionality that has been worked out to the last detail.

www.hansgrohe.co.uk/modern

Modern Style world.

Talis® Select S and Talis® S.

Talis® Select S

The prominent Select button lets you use the Talis Select S with the greatest of ease. You turn the water flow on and off at the touch of a button. Turn the button to set your chosen temperature. Together with the spout merging harmoniously into the lean, conical body of the mixer, the Select button lends this a unique aesthetic clarity.

Talis® Select S 190

Talis® Select S 100

Talis® Select S 80

Talis® S

With its slender lever and upright, conical body, the Talis S is a mixer that combines the functionality of a classic single lever mixer with modern design language.

Modern Style world.

Talis® Select E and Talis® E.

Talis® Select E
In addition to its ease of use thanks to Select technology, the Talis Select E also presents generous surface areas and precision contours giving every bathroom a modern character. The water flow is quite simply controlled at the touch of a button, and the button turned to control the water temperature.

Talis® Select E 240

Talis® Select E 110

Talis® E
Clear contours, a slender, upright body, and a lever matched perfectly to the spout lend the Talis E its modern high quality look.

Our recipe for success for more fun in the kitchen: Select™.

Kitchen mixers.

A touch ahead in the kitchen.

The new Metris® Select 320 mixer with pull-out spout and Select technology.

Life in the kitchen, and at the sink in particular, is determined by our everyday tasks. The more smoothly they flow, the more we enjoy our daily routine. With the new Metris Select, you can increase your efficiency quite simply at the touch of a button. The ergonomically designed pull-out function provides even more freedom of movement, while the water flow can be switched on and off with absolute precision using the Select button on the spout. So once you have opened the mixer using the lever, you can easily combine any number of tasks – with only one hand. This saves water and energy, and turns any kitchen task into kitchen pleasure at the touch of a button.

The height of the mixer, its swivel function, and the practical pull-out spout with ergonomic handle offer the greatest possible freedom at the sink.

The mixer is opened using the lever, and the desired temperature selected. The water flow can then be switched on and off quickly with absolute precision using the Select button on the spout.

Metris® Select 320
with pull-out spout

DESIGN AWARD 2015

Any number of tasks can be combined harmoniously without needing to close the spout by the lever. At the same time, the water is only provided when it is actually needed. Meaning that not a drop of precious water is wasted.

Even filling a large pot or saucepan is effortless, and can be done with only one hand. Simply touch the Select button – and you have water.

So that everything runs in the kitchen at the touch of a button.

Metris® Select with swivel function and Select technology.

Working in the kitchen can be great fun. For instance, treating yourself to a lovely meal after a long day at work, or getting together with friends to cook. The Metris Select kitchen mixer enhances this fun factor with the Select button on the front. Unlike the mixer with pull-out spout, it can be activated "in passing", and turns the water on and off without interrupting the work flow unnecessarily. The Select button can also be operated by the back of a hand or an elbow, so the mixer stays nice and clean, even if you have dirty hands. It's also much easier to turn the water off between various tasks, so you avoid wasting water and energy.

To start, the mixer only needs to be opened once at the lever. Now the flow of water can be switched on and off at the Select button on the front.

This is especially practical when your fingers are dirty or you have your hands full.

Metris® Select 320
with swivel spout

Focus Open 2014
Silver

The mixer can be operated with ease at the push of a button, with the front of the hand, the back of a hand, or an arm.

The mixer then always stays clean.

Our ideas for your comfort.

The Hansgrohe technologies.

hansgrohe
40°C

Select™ technology.

Pleasure at the touch of a button.

In the shower, the Select button changes to a different spray type or shower in moments at a simple touch. When fitted on bathroom and kitchen mixers, it also switches the flow of water on and off when pressed.

Select in the shower.

Hand and overhead showers.
A simple click of the Select button on the hand or overhead shower changes the spray type.

Thermostats.
Thanks to integrated Select technology, the flow of water at the thermostat can now be switched on and off precisely at the touch of a button. The Select buttons in their elegant settings can switch between the different shower heads and spray types.

Select on bathroom mixers.

The prominent Select button lets you use the mixers with the greatest of ease. You turn the water flow on and off at the touch of a button. If necessary, you can even control the mixer without your hands, simply by activating the button with your arm or elbow.

Select in the kitchen.

Mixer with pull-out function.
In addition to the pull-out spout, the Select technology also offers the maximum freedom of movement. To start, simply operate the lever to allow water to flow. Now the water can be switched on and off at the spout precisely and easily at the press of a thumb.

Mixer with swivel function.
Thanks to the Select button, the work flow in the kitchen now becomes even smoother. To start, simply operate the lever to allow water to flow. A simple push of a button at the front of the mixer spout is all it takes to stop and start the water flow. As easy as ABC with an elbow or the back of a hand – so the mixer stays clean.

ComfortZone technology. Bathroom.

To suit every requirement.

The Hansgrohe ComfortZone defines the individually useable area between the basin and mixer, to suit any requirement.

ComfortZone test.

Which mixer goes with which basin? How high or low does a mixer have to be to avoid irritating splashes? And how much freedom do you need between the mixer and basin for the optimal comfort? With its ComfortZone test, a specially developed test procedure simulating real conditions, Hansgrohe analysed the properties of over 9000 combinations of its mixers and the most frequently used basins from leading manufacturers. The tests investigated the free space between the mixer and the basin, the splashing behaviour at different water pressures, and the spray from the washing of hands. You will find the results and recommendations at: **www.hansgrohe.co.uk/comfortzone-test**

Simply scan the code to watch the explanatory video.

Metris® 260
High level of flexibility: high spout for maximum freedom of movement.

Metris® 230
Very comfortable: Even large containers can be filled with ease.

Metris® 200
Simply practical: even a watering can poses no problems.

Metris® 110
Pleasant height: daily routines managed with ease.

Metris® 100
Compact and functional: the optimal solution for small basins.

ComfortZone technology. Kitchen.

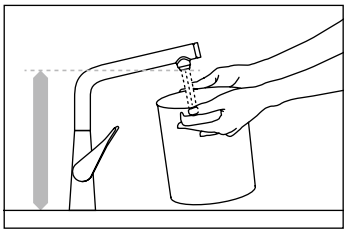
More freedom of movement at the sink.

For the kitchen mixers, the ComfortZone unfolds in no fewer than three dimensions: in the height of the mixer, in the swivel function, and in the pull-out spray/spout.

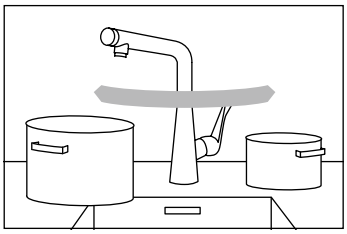
Simply scan the code to watch the explanatory video.

ComfortZone.

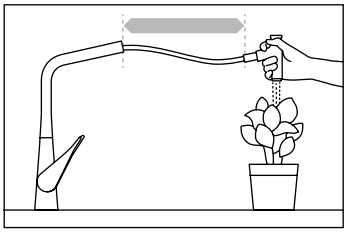
Height.
An ultra high spout offers plenty of space, and is ideal for filling large containers and pots.



Swivel function.
The mixers offer you either a limited swivel range (110°/150°) or all-round freedom of movement (360°). Especially practical for work to the right and left of the mixer.



Pull-out spray/spout.
The pull-out spray or pull-out spout extends the range at the sink. An advantage, for example, in watering plants, or effortlessly cleaning down the sink.



EcoSmart technology.

Lots of fun with low water consumption.

Integrated invisibly in the product, the EcoSmart technology reduces the flow of water, thereby saving water and energy. For the sustainable use of water.

Shower.
Back in 1987 – long before saving water became such a major concern – Hansgrohe developed a hand shower, the Mistral Eco that used only half the amount of water and saved precious energy. Today, EcoSmart showers consume only nine or six litres per minute, and save up to 60 % water and energy.

Basin mixers.
EcoSmart can also save a lot of water for everyday routines in the bathroom. Thanks to this technology, we were able to reduce the consumption of our basin mixers to only five litres a minute as standard.

QuickClean technology.

The fast solution for more cleanliness.

The practical QuickClean technology lets you quite simply rub away limescale effortlessly with your finger.

Shower.
All our showers have flexible silicone jets. Any deposits are quickly removed simply by rubbing a finger over them. Well looked-after limescale-free products not only look much nicer, they work better and last longer.

Bathroom and kitchen mixers.
The aerators in our bathroom and kitchen mixers have been fitted with flexible silicone slats, making it even easier to clean them. Simply rub gently any limescale with your finger, and it is gone. Your mixers then stay looking lovely for longer – and work for longer.

More technologies.

Innovative ideas for long lasting pleasure.

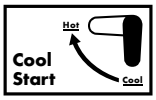
Air Power

The AirPower technology mixes large quantities of air in the water. For a soft, splash-free water spray and rich, full shower drops.

AirPower.

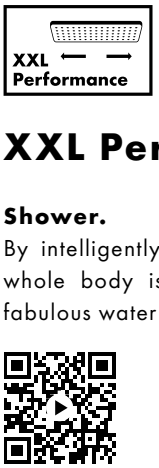
Shower.
Generous amounts of air are drawn in through the spray face. This quite literally stirs up the in-flowing water. The resulting air-enriched drops are fuller, lighter and softer. This not only feels good, but it also means that you are making the most efficient and splash-free use of your precious water.

Bathroom and kitchen mixers.
Your AirPower mixer combines the flowing water with air. The water spray therefore splashes less and is very pleasant to use.



CoolStart.

Bathroom and kitchen mixers.
CoolStart is the latest step on the way to maximum sustainability: as the mixer is turned on, only cold water flows. You do not consume hot water or the energy required for it until you actively turn it to the left. You will find this function as an option on our basin mixers and kitchen mixers.



XXL Performance.

Shower.
By intelligently distributing the water over a large area, the whole body is enveloped in a feel-good shower rain. For fabulous water pleasure.

MagFit magnetic holder.

Kitchen mixers.
Thanks to the MagFit function, the hose slides back almost silently, and slots back into place in the middle of the mixer spout.

Technologies

Details on page 92 onwards.

Simply scan the code to see the technologies in action.

Select

One touch regulates the waterflow: The shower or spray type can be switched on and off or changed with ease.

Eco Smart

Reduces the flow rate to save water and energy. For long-lasting pleasure.

Air Power

Combines water with a generous amount of air. For a soft, splash-free water spray and rich, full shower drops.

Quick Clean

Remove limescale deposits simply by rubbing the flexible silicone jets.

XXL Performance

Distributes the water over the large spray face enveloping the whole body in drops of well-being.

Comfort Zone

Defines the individually useable area between the basin and mixer, to suit any requirement.

Cool Start

Cold water starts to flow when it is opened in the basic setting. You consume hot water only when you need it.

Spray modes

Details on page 32 onwards.

Simply scan the code to see the spray types for yourself.

Rain Air

Gentle shower rain with air-enriched drops.

Rain Air XL

Soft relaxing shower rain.

Rain

Full shower rain, ideal for washing hair.

Rain XL

Tremendous showering pleasure over a larger area.

Soft Rain

A soft water spray that caresses the body for that feel-good sensation.

Intense Rain

Intense water spray, perfect for rinsing out shampoo.

Caresse Air

Dynamic, revitalising massage spray.

Massage

A strong massage spray that invigorates and soothes aching muscles.

Turbo Rain

Intensive shower rain that refreshes and rejuvenates.

Mix

A harmonious combination of soft shower rain and a dynamic spray.

Whirl

Concentrated targeted massage spray.

Mono

Targeted, soothing relaxation spray.

Rain Flow

Powerful flood jet for generous coverage.

Rain Stream

Generous flow of soft sprays.
